CLINICAL EXCELLENCE PORTFOLIO · EDITION 2026

# DISPO-CONCEPT.

Medical-Grade Elements · AI-Integrated Facilities · Swiss-Grade Systems

A Make-in-India medical consumables platform building the clinical-grade elements the facilities of care depend on — hospitals, clinics and corporate medical centers. Dispo-Concept pairs an ISO-classified clean-room supply chain with DISPO IQ, our AI layer for stock, sterility and spend — engineered to the documentation discipline the world's best medical centers demand, and supplied from Bengaluru to the world.

EDITORIAL CHARTER & NOTICE

# How to read this portfolio

## WHO THIS PORTFOLIO IS FOR

| | |
|---|---|
| **Clients & users** | of medical-grade elements — the people who rely on what we make at the moment of care. |
| **Medical centers & facilities** | that specify, procure and manage consumables under tender-grade scrutiny. |
| **Corporate administrators** | responsible for workplace clinics, first-aid compliance and on-site care. |
| **Investors & partners** | evaluating the platform behind these capabilities. |

Supply relationships, facility programmes and partnership discussions are governed by definitive agreements; all enquiries are routed through the directors in Bengaluru.

### Basis of information

Historical financials are drawn from audited FY2024-FY2025 statements (J Ramesh & Associates, FRN 014148S); FY2026 figures are management provisionals labelled Projected; FY2027-FY2029 are management estimates.

### Forward-looking statements

Projections and programme targets involve known and unknown risks and are not guarantees; recipients should conduct independent due diligence.

### Emblems & trademarks

The Make in India wordmark, the United Nations emblem and the European Union flag appear in simplified form as references to frameworks the Company aligns with; no affiliation, endorsement or certification is claimed or implied, and all rights remain with their respective owners.

01

SECTION 01 / 03 · THE COMPANY

# A platform built to a world standard.

Dispo-Concept Private Limited is a Bengaluru-based medical consumables platform founded in 2017 to make clinical-grade supply dependable, documented and intelligent — serving hospitals, clinics and corporate medical facilities that hold themselves to world-class standards.

| | |
|---|---|
| 01 | Dispo-Concept at a glance |
| 02 | The mandate & structured benefits |
| 03 | The Swiss-grade doctrine |
| 04 | Make in India manufacturing |

THE COMPANY · 01

# Dispo-Concept at a glance

Three years of compounding growth — from ₹29.98 Cr in FY2024 to ₹48.41 Cr in FY2025 (+61.5%) and a projected ₹97.46 Cr in FY2026 — carried on a balance sheet where net worth rose to ₹7.04 Cr and debt-to-equity compressed to 0.38×.

| ₹97.46 Cr | +101.3% | ₹2.10 Cr | ₹7.04 Cr | 0.38× |

THE MANDATE · 02

# Facilities of world standard

The world's leading medical centers ask four things of a consumables partner — and Dispo-Concept exists to bring that standard to every medical facility in India, from multi-specialty hospitals to the clinic inside a corporate campus.

01

**Traceability**

every unit resolvable to a batch, a date and a source, on demand

02

**Sterility assurance**

barrier integrity that survives transport, storage and handling

03

**Uptime**

supplies arriving on a rhythm so precise that stockouts and expiry write-offs approach zero

04

**Data discipline**

consumption, cold-chain and compliance records that integrate with the facility's own systems

## I

### Clinical-Grade Elements

consumables manufactured to reference standards — barrier performance, biocompatibility, sterility documentation — fit for the most demanding wards.

## II

### AI-Integrated Management

DISPO IQ manages forecasting, FEFO rotation, cold-chain telemetry and procurement automation so facilities run on data, not phone calls.

## III

### Swiss-Grade Systems

a seven-gate quality system, ISO-classified clean rooms and batch-level documentation culture.

Each pillar reinforces the others — better manufacturing data feeds the AI, and better AI tightens the quality loop.

THE MANDATE · 02

# World-class structured benefits, by seat at the table

One platform, four constituencies — every claim backed by a dashboard the facility can watch.

| | |
|---|---|
| **Hospital & GPO procurement** | Consolidated catalogue, transparent rate cards and batch documentation that survives the strictest tender audit — with a single accountable partner across categories. |
| **Facility & biomedical teams** | Scheduled replenishment cycles, expiry-controlled rotation and cold-chain visibility, so biomedical and nursing teams spend their hours on care rather than counting stock. |
| **Corporate administrators** | The Corporate Care programme formalises workplace clinics end-to-end — from first-aid compliance records to scheduled resupply — under one contract with one SLA. |
| **Clinical staff & patients** | The quiet guarantee behind every procedure: the right element, sterile and in date, exactly where the moment of care requires it to be. |

THE STANDARD · 03

# The Swiss-grade doctrine

Borrowed from the precision industries that treat documentation and tolerance as products in their own right — seven tenets every function, from sourcing to dispatch, is measured against. Unglamorous by design; that is what holds under audit, under load and under scrutiny.

### 01 TOLERANCE

specifications are written as measurable tolerances, not adjectives; every parameter that matters has a number and a test method.

### 02 DOCUMENTATION

every batch leaves with its dossier: certificates of analysis, test references, handling conditions.

### 03 TRACEABILITY

RFID and QR batch genealogy resolves any unit to source materials, line, shift and dispatch route; recall becomes a query, not an investigation.

### 04 REDUNDANCY

dual-supplier policy on critical inputs and safety-stock rules so a single point of failure never becomes a ward-level stockout.

### 05 CLEANLINESS

ISO Class 7/8 clean-room processing, gowning discipline and environmental monitoring as daily routine, not annual event.

### 06 SERVICE LEVEL

24-48 hour scheduled replenishment in served geographies, with escalation paths agreed in the contract.

### 07 AUDITABILITY

facilities and assessors walk the same evidence trail the Company does: gates, records and KPIs designed to be examined, not narrated.

MANUFACTURING · 04

# Make in India — precision, manufactured at home

## Aligned with the Make in India programme

Dispo-Concept manufactures and converts medical-grade elements domestically, deepening India's self-reliance in medical consumables. The gear mark above is shown in simplified form as a statement of programme alignment; the Make in India initiative remains the property of the Government of India, and no endorsement is claimed or implied.

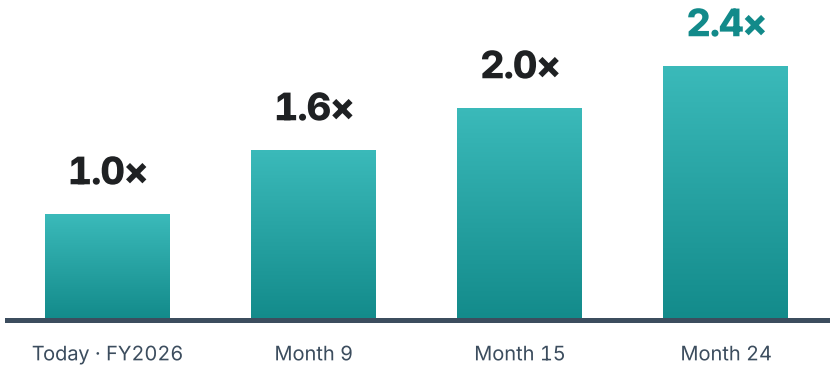

### POLICY TAILWINDS

- Quality Control Orders raising the floor for imports
- production-linked incentives pulling manufacturing depth onshore
- public procurement preferring documented domestic capability

> *For facilities the prize is practical — shorter resupply lines, locally accountable compliance files, and a partner whose plant they can actually walk through.*

## Capacity build-out

COMMISSIONED CLEAN-ROOM LINE

ISO Class 7/8 clean-room converting with automated packaging and cold-chain-ready warehousing — supporting a ₹275 Cr revenue run-rate by FY2029 (management estimates).

SECTION 02 / 03 · INTELLIGENCE, PRODUCT & STANDARD

02

# AI you can audit. Products you can inspect.

DISPO IQ manages stock, sterility and spend as a control loop; seven gates stand between source and ward; and the same documentation discipline is built for the UN, EU and Indian channels the Company supplies today and tomorrow.

05 AI.01 Manufacturing intelligence

06 AI.02 DISPO IQ supply intelligence

07 Medical-grade elements

08 Seven gates from source to ward

09 Supply to the world

AI · MANUFACTURING · 05

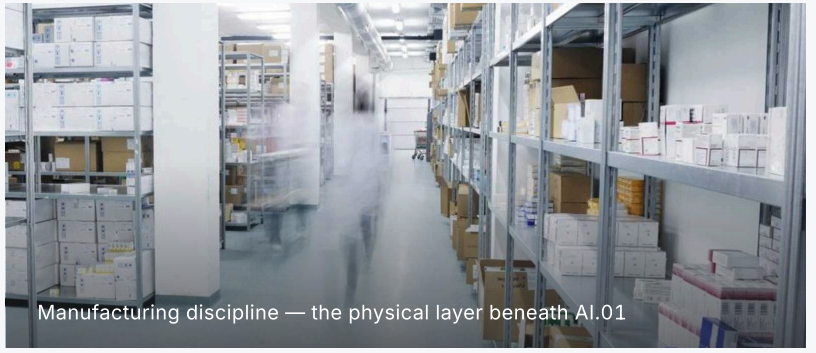

# AI.01 — Manufacturing intelligence

Machine vision inspects seals, dimensions and surface defects at line speed — a consistency no manual sampling regime can match. Predictive maintenance watches vibration, cycle times and environmental data to intervene before equipment drifts, converting unplanned downtime into planned minutes. Batch parameters stream into a digital genealogy, so every deviation is traceable to a cause.

1. **Intelligence & Planning** — demand signals and inventory state shape the production plan
2. **Sourcing** — dual-qualified inputs with incoming QC and certificate checks
3. **Cleanroom** — ISO Class 7/8 converting under monitored environmental control
4. **Vision QC** — machine-vision inspection of seals, dimensions and defects
5. **Dispatch** — batch-documented release into temperature-aware logistics

## ENGINEERING TARGETS

- **Vision QC** — 100% machine-vision coverage of critical quality points by Month 12
- **Uptime** — unplanned downtime on critical equipment modelled down roughly 30% at steady state
- **Genealogy** — digital batch genealogy live from commissioning day

Manufacturing discipline — the physical layer beneath AI.01

AI · SUPPLY · 06

# AI.02 — DISPO IQ supply intelligence

In most facilities the heaviest cost of consumables is not the invoice — it is the friction around it: stockouts that trigger emergency purchases, expiry write-offs from mis-rotated stock, cold-chain excursions discovered too late, and a paper trail that collapses at audit time. DISPO IQ is the answer: an AI layer that sits between the Company's supply operation and the facility's own systems, managing replenishment as a control loop rather than a series of phone calls.

**L4** **Dashboards & ERP integration**

facility dashboards for stock, expiry and compliance; ERP-agnostic connectors, GST e-invoicing and e-way bill automation.

**L3** **AI engine**

demand forecasting per department and SKU, FEFO rotation logic, cold-chain excursion detection and procurement automation — the decision-making core.

**L2** **Data core**

structured telemetry and batch records: consumption events, temperature streams, receipts and issues, retained as the audit-grade memory of every unit.

**L1** **Facility endpoints**

ward-level bins, cold rooms and scanners that capture what is actually happening at the point of use.

THE PROMISE

**One promise to the facility head** — the four failure modes engineered down to near zero, every claim watchable on a dashboard.

AI · SUPPLY · 06

# Structured benefits, engineered for medical users

## Stockout prevention

Forecast-driven replenishment keeps par levels honest; the 24-48 hour cycle in served geographies turns shortages from crises into calendar entries.

DISPO IQ · FORECASTING

## Expiry & FEFO control

First-expiry-first-out rotation enforced at bin level, with alerts ahead of expiry windows — write-offs shrink because rotation never relies on memory.

DISPO IQ · ROTATION LOGIC

## Cold-chain assurance

Continuous temperature telemetry with excursion alerts across storage and transit, retained as evidence for QA and regulators — not as a post-mortem exhibit.

DISPO IQ · COLD-CHAIN TELEMETRY

## Procurement automation

Consumption-based ordering with approval trails, e-invoicing and rate-card discipline — procurement time redirected from chasing paper to negotiating value.

DISPO IQ · AUTOMATION

Features deploy in phases across client facilities · Integration: ERP-agnostic connectors · GST e-invoicing · e-way bill automation · standard file-based exchange for hospital information systems.

Six families, one documentation standard — full catalogue and technical datasheets on request.

PORTFOLIO · 07

# Medical-grade elements — the product portfolio

Organised the way facilities actually buy — by the clinical moment and the compliance duty each element serves. Six families cover the daily consumption of a modern medical facility, each carrying the same Swiss-grade paperwork whatever its price point.

### 01 Surgical & procedure consumables

single-use items for procedures and minor interventions; batch records on every carton · EN test methods

### 02 Drapes, gowns & facility textiles

barrier textiles for operating and procedure environments · EN 13795 reference framework

### 03 Wound care & dressings

modern dressings covering absorption, barrier and fixation across wards and clinics · sterility & barrier documentation

### 04 Infection prevention & hygiene

sanitizers, disinfectants, surface and hand-hygiene consumables, PPE essentials · infection-control programme support

### 05 IV & infusion elements

particulate control, compatibility documentation and cold-chain-aware handling

### 06 Custom procedure packs & kitting

procedure-specific bundles to a facility's own theatre lists: one sterile pack, one record, one consumption event

QUALITY SYSTEM · 08

# Seven gates from source to ward

Each gate has an owner, a record and a refusal right — material that fails a gate does not proceed on anyone's authority. Gate records feed the same data core that powers DISPO IQ, so quality evidence and supply intelligence are one system, not two.

1. **Supplier qualification** — dual-qualified sources; audits, samples and certificates before the first purchase order
2. **Incoming quality control** — every consignment checked against specification; certificates verified, not filed unread
3. **Cleanroom processing** — ISO Class 7/8 converting with gowning discipline and continuous environmental monitoring
4. **In-process controls** — line-speed machine vision holds tolerances during production, not after
5. **Barrier & sterility validation** — seal strength, barrier performance and packaging integrity to referenced test methods
6. **Batch release** — QA owns release: dossier complete, genealogy digital, quarantine respected
7. **Post-market surveillance** — field feedback and trend analysis loop back into specifications and supplier reviews

## Reference frameworks

| | |
|---|---|
| Barrier textiles | **EN 13795** |
| Examination gloves | **EN 455 series** |
| Sterile barrier packaging | **ISO 11607** |
| Cleanroom class | **ISO 14644** |
| Traceability | **RFID + QR genealogy** |
| QMS certification | **ISO 13485 programme (target M15-M24)** |

Full standards library and control plans maintained in the QA manual, shared during facility audits.

GLOBAL STANDARDS · 09

# Supply to the world.

Swiss-grade documentation is an export asset. The regulatory posture is built in two directions at once — inward for the Indian system the Company operates in today, outward toward the frameworks governing the markets and multilateral channels it supplies to tomorrow.

### MULTILATERAL SUPPLY READINESS

UN agencies and multilateral health programmes procure consumables at continental scale under exacting documentation regimes. The Company is walking the UN Global Marketplace registration pathway so its dossiers, tests and traceability are procurement-ready.

### EUROPEAN PATHWAY

Europe is the reference market for consumables discipline: CE marking under the Medical Device Regulation, EN test methods, and buyers who audit the file behind the box. **Export line preparation:** technical files, notified-body alignment, EN-referenced testing.

## REGULATORY POSTURE · STATUS

- **CDSCO** — licensed operations under applicable registration routes
- **WHO-GMP** — GMP-aligned process discipline
- **EN 455 / EN 13795** — adopted as QA lab references
- **ISO 13485** — programme underway, certification targeted M15-M24
- **CE · EU MDR** — export technical-file preparation in progress
- **UN procurement** — UNGM registration pathway mapped

Emblems shown in simplified form for identification only; no endorsement claimed or implied.

SECTION 03 / 03 · PARTNERSHIP & GROWTH

03

# The leading partner for corporate medical centers.

One contracted partner for the workplace clinic; a three-phase pan-India network gated on service quality; and founders who report to the same standard they audit their suppliers by.

10 Corporate Care programme

11 Expansion across India

12 Founders & governance

13 Compliance & stewardship

14 The road to ₹275 Crore

PROGRAMME · 10

# Corporate Care — one partner for the workplace clinic

India's corporate campuses are formalizing on-site medical facilities fast — but supply arrangements rarely match the formality of the facilities themselves. Corporate Care is one contracted partner for every consumable a workplace clinic uses, one service level, and compliance records that hold up under the Factories Act and internal EHS audits alike.

**1 Assess**

clinic audit and SKU mapping against headcount, risk profile and statutory duties

→

**2 Kit**

setup and restock bundles configured per station: first-aid, hygiene, observation stock

→

**3 Replenish**

24-48 hour scheduled cycles managed by DISPO IQ, with par levels that learn

→

**4 Comply**

Factories Act first-aid readiness records maintained as a standing deliverable

CONTINUOUS LOOP — EVERY REVIEW RESTARTS THE CYCLE AT ASSESS

| TIER | CLINIC SCOPE | REVIEW | SERVICE CYCLES |
|---|---|---|---|
| **Essential** | first-aid & hygiene kits, scheduled resupply | **annual review** | **scheduled cycles** |
| **Advanced** | full clinic stock, DISPO IQ dashboard, compliance records | **quarterly review** | **24-48 h cycles** |
| **Mission-Critical** | multi-site cover, cold-chain elements, emergency buffer stock | **monthly review** | **priority dispatch** |

- **25 pilot campuses** in Months 9-15
- **150+ corporate facilities** by FY2029, margins protected by compliance-locked contracts

NETWORK · 11

# Expansion across India

Coverage in medical supply is a promise about distance — a facility close enough to a stocking hub to be served on a schedule rather than a hope. Three deliberate phases, each gated on service quality in the previous one, because a hub that cannot deliver the SLA is a liability, not coverage.

PHASE 1

**1** Months 0-12

### Deepen the South

- Karnataka consolidation
- Chennai hub for Tamil Nadu
- Hyderabad hub for Telangana
- **2 new depots** · **120+ new institutional accounts** (targets)

→

PHASE 2

**2** Months 12-24

### West & North

- Mumbai & Pune for Maharashtra
- Ahmedabad for Gujarat
- Delhi-NCR entry
- **3 hubs** · **180+ new accounts** (targets)

→

PHASE 3

**3** Months 24-36

### Complete the map

- Kolkata for East · Bhubaneswar · Guwahati
- pan-India footprint
- **cumulative 500+ accounts across 40+ districts** (targets)

| | |
|---|---|
| HEADQUARTERS | Bengaluru · HQ & flagship clean-room |
| PHASE 1 · SOUTH | Chennai · Hyderabad |
| PHASE 2 · WEST & NORTH | Mumbai · Pune · Ahmedabad · Delhi-NCR |
| PHASE 3 · EAST & NORTH-EAST | Kolkata · Bhubaneswar · Guwahati |

Six-hub network and account figures are FY2029 programme targets (management estimates), gated on service-level performance.

LEADERSHIP · 12

# Founders & governance

Promoter-led in the old sense — the people who own the Company run it, and the people who run it are reachable by every client it serves.

DIRECTOR PHOTOGRAPH — RESERVED

## Prakash H C

**Co-Founder & Director** — leads operations, supply chain and partner relationships: the physical backbone, from clean-room commissioning to the last-mile replenishment rhythm facilities feel as reliability.

SHAREHOLDING **25.00%**

DIN 07761276 · 7,50,000 equity shares of ₹10 each.

DIRECTOR PHOTOGRAPH — RESERVED

## Praveen H C

**Co-Founder & Director** — leads commercial, finance and institutional accounts: the accountability backbone, from rate-card discipline and audit relationships to Corporate Care partnerships.

SHAREHOLDING **75.00%**

DIN 07761278 · 22,50,000 equity shares of ₹10 each.

### GOVERNANCE & REPORTING

- ESOP-free capital table held by the two promoters **(₹3.00 Cr paid-up)**
- accounts audited by J Ramesh & Associates **(FRN 014148S)**
- banker **State Bank of India**
- quarterly management reporting to partners and observers
- FY2026 figures are management projections **dated 26 June 2025**

ROADMAP · 14

# The road to ₹275 Crore

**M0 · M3**

### Foundations locked

capital closure, clean-room vendor freeze, QMS baseline audit, ISO 13485 programme opened

**M3 · M9**

### Capacity comes online

clean-room commissioning, Chennai & Hyderabad hubs live, DISPO IQ telemetry across flagship accounts

**M9 · M15**

### Scale & pilots

capacity 1.6×, Maharashtra entry, Corporate Care pilots in 25 campuses, vision-QC coverage target reached

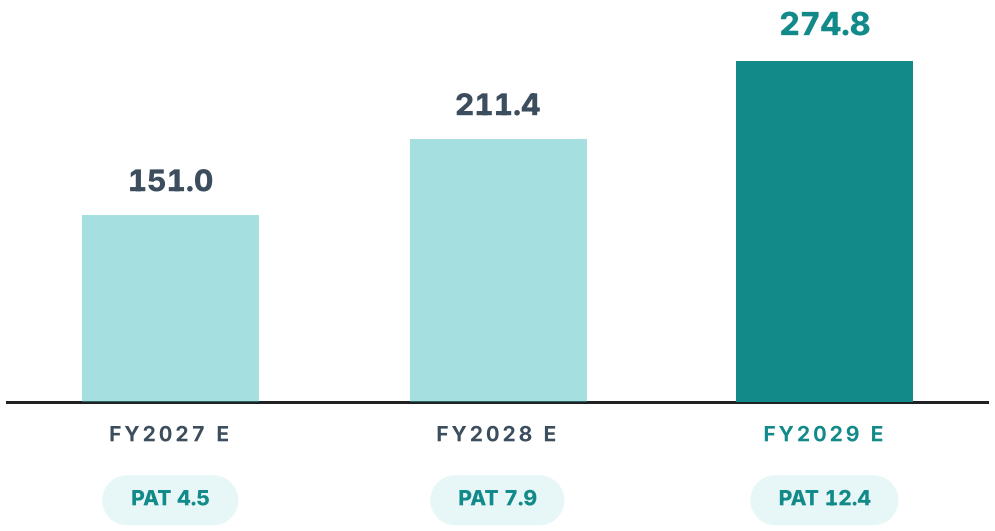

**M15 · M24**

### Certification & depth

capacity 2.4×, NCR & Gujarat live, ISO 13485 certification milestone, 350+ accounts, export technical-file preparation complete

## Outlook — FY2027 to FY2029

Revenue ₹ Cr (bars) with PAT ₹ Cr (chips) · management estimates, not guarantees

**Statutory identity:** CIN U36999KA2017PTC100561 · biomedical waste via authorized BMW Rules 2016 channels · staged shift to recyclable packaging · take-back programme in design with key accounts.

BEGIN THE PARTNERSHIP

# Care deserves a standard.

Every engagement begins the same way — a facility walk-through, an honest read of your consumption and compliance baseline, and a proposal written against this portfolio's own doctrine. Choose the door that matches where you sit.

### Corporate medical facilities

- Clinic assessment & SKU mapping
- Corporate Care tier selection
- compliance record baseline

Book a facility assessment ›

### Hospitals & institutional buyers

- Catalogue & technical datasheets
- trial orders & rate cards
- QA audit walk-through

Request the audit pack ›

### Global & multilateral partners

- Documentation & compliance dossier
- export line technical files
- distribution conversations
